SHIVAM KUMAR

Begusarai,Bihar | 7488881563 | 15shivambgs@gmail.com | LinkedIn | Git | Portfolio

PROFESSIONAL SUMMARY

Data Analysis Intern and MCA graduate with hands-on experience in Python, Pandas, NumPy and MySQL for data cleaning, preprocessing and visualization. Skilled at translating complex datasets into actionable insights through clear reports and dashboards. Recognized as a national finalist in enterprise risk strategy, bringing strong analytical aptitude, attention to detail and a collaborative mindset to a data analytics role.

CORE COMPETENCIES & TECHNICAL SKILLS

- Programming: Python, JavaScript, C++
- Frontend: HTML, CSS, React.js
- Database: MySQL, Oracle
- Data Analysis: Pandas, NumPy, Matplotlib
- Tools: Jupyter, VS Code, GitHub, MySQL Workbench, Vercel, PowerBI, Excel

EDUCATION

Master of Computer Application Aug 2024 – May 2026

AKS University Satna, Satna MP | CGPA -8.82/10

PROFESSIONAL EXPERIENCE

Shanti Infosoft, Indore MP | Data Analyst Intern Jan 2026 – Jun 2026

- Performed data cleaning, preprocessing, and analysis on real-world datasets using Python and SQL
- Created visualizations and reports to identify trends, presented findings to stakeholders, and supported data-driven decision-making
- Tech Stack: Python, pandas, NumPy, Matplotlib, MySQL
- Delivered monthly reports with actionable insights to support business and marketing leadership

KEY PROJECT

IPL Data Analysis Dashboard | Python, SQL, Power BI

- Performed data cleaning, transformation, and exploratory analysis on IPL dataset using Python, Pandas, and NumPy to uncover key performance metrics
- Developed an interactive Power BI dashboard with dynamic visuals and filters to track team performance, player statistics, and season trends, enabling data-driven insights
- Tech Stack: Power BI , Python, Pandas, NumPy, Matplotlib.

Global Space Missions Analysis | Power BI, Python, SQL, Data Modeling

- Focus: Power BI, Data Visualization, SQL, Data Modeling
- Architected a comprehensive Power BI dashboard analyzing 15,000+ global space mission records (1957–Present), creating interactive visualizations to track launch success rates and agency performance.
- Designed an end-to-end business intelligence solution for space launch analytics, transforming raw datasets into actionable insights using advanced Power BI chart types and DAX calculations.
- Engineered scalable data models for historical and projected space exploration data, optimizing complex queries to ensure seamless dashboard rendering and dynamic filtering.
- Developed Python scripts to automate data ingestion and implemented debugging routines to ensure data integrity in ETL processes..

CERTIFICATION

- Data Science: Saylor University
- AWS Course: Anudip Foundation
- Data Analysis: Mind Luster
